

Built on a customizable clinical model delivered by highly engaged medical professionals, Adfinitas Health provides exceptional acute and post-acute care rooted in evidence and innovation.

Adfinitas Health clinicians lead site-based teams, managing the clinical, administrative, and operational components of patient care necessary to provide a responsive high-quality, customized service for every partner.

Our mission is simple: We are dedicated to the partners we serve and the health of our patients.

Partnered with more than 84 hospitals and post-acute facilities across the US, Adfinitas is committed to empowering our providers through industry leading training programs, mentorship and a resilient work environment supported by a culture of teamwork. The value we place on supporting our providers allows us to recruit and employ highly skilled physicians and advanced practice providers who provide expertise, leadership, and advisory support to improve clinical care, quality, and operations.

“With Adfinitas Health, we have stabilized our turnover among providers and our stakeholders remain positively engaged in our hospital and its operation. They possess a depth of providers that are well developed at the medical director level, a key component for the hospitalist service. By partnering with Adfinitas Health, we can transition to population health management and modify our financial incentives under a global cap budget. It has been a very positive experience for us.”
